About Me

I am a mechanical engineer, graduated from the University of Texas with an interest in programming. After several months with few job prospects, many job applications, and few responses, I decided to take a leap and take a programming course to improve myself, and potentially change career paths. Learning is essential to life, and I would like to get the opportunity to learn more about web development and improve my skills in your company.

Education

BS ME University of Texas at Austin 2016 - 2020

Attended the Cockrell School of Engineering through the Mechanical Engineering Department. Acquired experience with mathematics, mechanical systems, and programming principles. Learned Python and MATLAB.

UT Coding Bootcamp March - August 2021

Attended Bootcamp and learned Web Development techniques, technologies and programming languages. Learned HTML, CSS, MySQL, Git, and JavaScript libraries and frameworks such as Node.js, Express.js, and React.js.

Projects

Stumble: A simple web application that uses a zip code API and a brewery database to find local breweries in any area in the US.

Check my GitHub for challenges completed during the bootcamp or check my portfolio at ariellongoria.github.io

Skills

- Python
- JavaScript
- HTML
- CSS
- Git
- Node.js
- Express.js
- React.js
- Testing with Jest
- SQL and ORMs
